I started working with programming in 1997, and worked for large and small companies, in which I was given a vast knowledge in the Brazilian and international market. Then I continued as a Delphi programmer, actively participating in discussion groups. Many of the jobs I did were involved with financial and administrative processes for government agencies. I also worked as a Java programmer for over 6 years, using market frameworks, integrating tools and developing APIs.

Enthusiast DevOps culture. Currently working as a **Software Architect**, showing and conducting projects involving continuous development and continuous deployment and cloud computing, and Professional Scrum Master certificate by [scrum.org](http://scrum.org).
